

Electronics Technician

Position:

We are a fast growing company leading cutting edge MR imaging technology. We are seeking a skilled and experienced Electronics Technician to join our team. The candidate will be responsible for electronic assembly, test, and measurement of electronic circuits and subassemblies per documented procedures. This position is based in London Ontario.

Responsibilities:

- Test assemblies and sub-assemblies per test documentation.
- Setup and operate manually assembly systems.
- Support the implementation and validation of process and product documentation.
- Collect and analyze test data.
- Assist in new product development and introduction.
- Perform assembly and integration operations consistently per documented procedures and applicable standards.
- Utilize independent judgment to identify and articulate issues to higher levels of management.
- Competency with Microsoft Office suite (Word, Excel)
- Fluent in English with above average writing skills.

Education:

Diploma in technical field, electronics technology preferred, or equivalent experience.

Experience:

Entry level position, experience with electronics technology preferred.

Required Skills:

Working knowledge of basic electronic components such as capacitors, inductors, resistors, and diodes. Must be able to use basic electronic test and assembly equipment, such as soldering irons, digital multi-meters, and DC power supplies. Must be able to demonstrate the ability to take basic measurements, such as voltage and current of in circuit components.

Preferred:

Experience soldering surface mount components and/or IPC-A-610 certification. Experience working in an industrial R&D environment.

- Please send your resume to the following address info@ceresensa.com
- We thank all applicants, however only those selected candidates will be contacted.
